4. Website

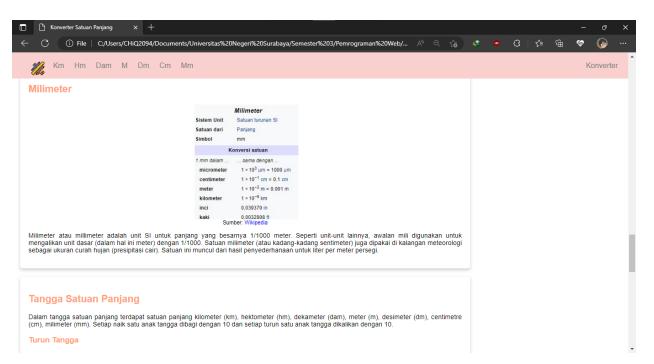

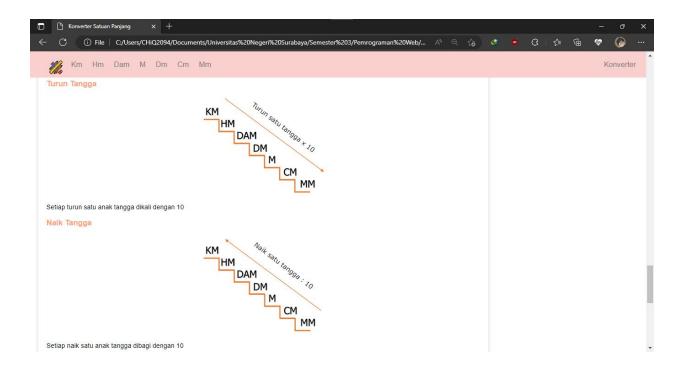

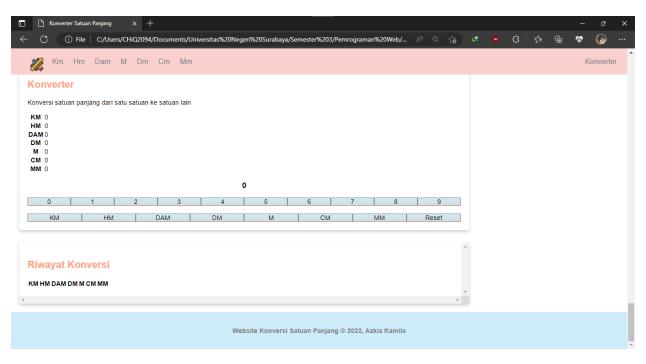

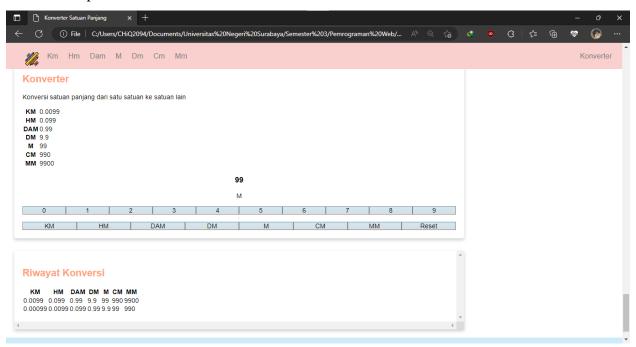

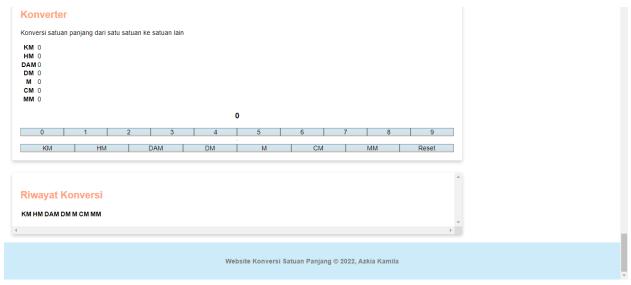

5. Website Output

6. Website Breakdown

Bagian sub-header terdapat opsi satuan panjang dan Konverter yang dapat user gunakan sebagai shortcut. Untuk opsi satuan panjang ketika user klik maka website akan scroll otomatis ke materi tiap satuan panjang, sementara untuk tulisan Konverter ketika user klik maka website akan scroll otomatis pada bagian konverter satuan panjang.

Bagian konverter akan terlihat number-pad yang dapat digunakan oleh user untuk input jumlah yang diinginkan dan terdapat opsi satuan panjang yang diinginkan. Ketika user menggunakan konverter maka akan muncul hasilnya, dan di bawah sendiri terdapat fitur Riwayat konversi untuk memudahkan user melihat hasil konversi sebelumnya.
